

2. Specific questions:

No.	I. Company Name	II. Managing Company	III. Business Unit	IV. Shareholders	V. Country	VI. Operation
Anglo American Managed Operations						
4	Anglo American	De Beers Group of Companies	De Beers	De Beers	Canada	Victor

1. "Tailings Facility" Name/identifier	2. Location	3. Ownership	4. Status	5. Date of initial operation	6. Is the Dam currently operated or closed as per currently approved design?
Victor Coarse PK & Low Grade Ore Stockpile	Lat 52°48'38.09" N Long 83°54'22.82" W	Owned and Operated	Active	2008	Yes

7. Raising method	8. Current Maximum Height (m)	9. Current Tailings Storage Impoundment Volume (m ³)	10. Planned Tailings Storage Impoundment Volume in 5 years time (m ³)	11. Most recent Independent Expert Review	12. Do you have full and complete relevant engineering records including design, construction, operation, maintenance and/or closure.	13. What is your hazard categorisation of this facility, based on consequence of failure?	14. What guideline do you follow for the classification system?	15. Has this facility, at any point in its history, failed to be confirmed or certified as stable, or experienced notable stability concerns, as identified by an independent engineer (even if later certified as stable by the same or a different	16. Do you have internal/in house engineering specialist oversight of this facility? Or do you have external engineering support for this purpose?	17. Has a formal analysis of the downstream impact on communities, ecosystems and critical infrastructure in the event of catastrophic failure been undertaken
Dry stack	12	5.94M	5.94M	2018	Yes	Minor	Anglo American Technical Standard (AA TS 602 001)	No	Both	Yes, 2004

18. Is there a) a closure plan in place for this dam, and b) does it include long term monitoring?	19. Have you, or do you plan to assess your tailings facilities against the impact of more regular extreme weather events as a result of climate change, e.g. over the next two years?	20. Any other relevant information and supporting documentation. Please state if you have omitted any other exposure to tailings facilities through any joint ventures you may have.
Yes, Yes	Yes, See Q20 for more information	Q17: Done as part of the original environmental impact studies prior to mining. Q19: 2018/2019 Closure design done externally. Report states 1:1000 year return periods AND Extreme Value 1 (EV1) frequency distribution from Environment Canada. Plan in place in line with Anglo American's Long-term Sustainable Mining Plan
